EDUCATION

Bachelor's Degree:

Pamukkale University, Computer Education and Technology , 2011 – 2015

Highschool:

Lütfi Ege Anatolian Teacher Training High School Science/Maths , 2005 – 2010

PROJECTS

- *Car Rental and Tracking*

I wrote a program that gives information about renting a car, registering a customer, and checking the rentability by calculating the customer's age, showing the delivered vehicles on the system, how many cars were rented per month, and how much revenue was gained.

Technologies Used: C#, Entity Framework

Github : <https://github.com/sezgnctn/AracKiralama>

- *Mvc Crud Transactions:*

I implemented Crud transactions using MVC layered architecture

Technologies Used : C#, Entity Framework, OOP, Bootstrap, ASP.NET, MVC.

Github : <https://github.com/sezgnctn/MVC-Crud-islemleri>

- *N11 Selenium Demo*

Github : <https://github.com/sezgnctn/N11TestAutomation/>

EXPERIENCES

09.2017 – 02.2018 Wissen Academie, İstanbul,Türkiye

- Introduction to Programming in C# with Windows Application, C# Syntax, C# Language Fundamentals, OOP in C#, .NET Framework Concepts, Generic Collections, MSSQL Server Fundamentals, Creating Tables and Data Types, Triggers and Procedures, Database Performance, Introduction to Entity Framework DB First, Querying Database with Linq and Lambda Expression,
